Sustainability

The United Nations Sustainable Development Goals (SDGs)

The United Nations Sustainable Development Goals (SDGs)

- Targets for global development adopted in September 2015, set to be achieved by 2030
- All countries of the world have agreed to work towards achieving these goals.
- We, EGU, should have the ambition to contribute to the United Nations Sustainable Development Goals (SDGs) and their sub targets.
- We should identify relevant SDGs that we can specifically make an impact on, based on the nature of our activities / operations.

UN Sustainability Goals - Relevant for Gliding?

- **Goal 3:** Good health and quality of life
 - **Goal 5:** Equality between genders
 - **Goal 10:** Reduced inequality
 - **Goal 12:** Responsible consumption and production
 - **Goal 13:** Stop climate changes
 - In addition **Goal 17:** Cooperation to reach the goals a prerequisite to succeed with the sustainability work
- 
- A glider is shown in flight against a blue sky with scattered white clouds. Below the sky, a range of mountains with patches of snow is visible. The glider is positioned in the upper right quadrant of the image, flying towards the left.

What can EGU do?

Develop and run projects?

Monitor, collect and communicate data of good practice (and bad...)?

We need Poc.....

“Sports have the power to change the world. It has the power to inspire, the power to unite people in a way that little else does. It speaks to youth in a language they understand. Sports can create hope, where there was once only despair. It is more powerful than governments in breaking down racial barriers. It laughs in the face of all types of discrimination. Sports is the game of lovers.”

~NELSON MANDELA
